RC INDUSTRIES has a history of producing truck storage systems, accessories and metal fabrications which spans over forty years.

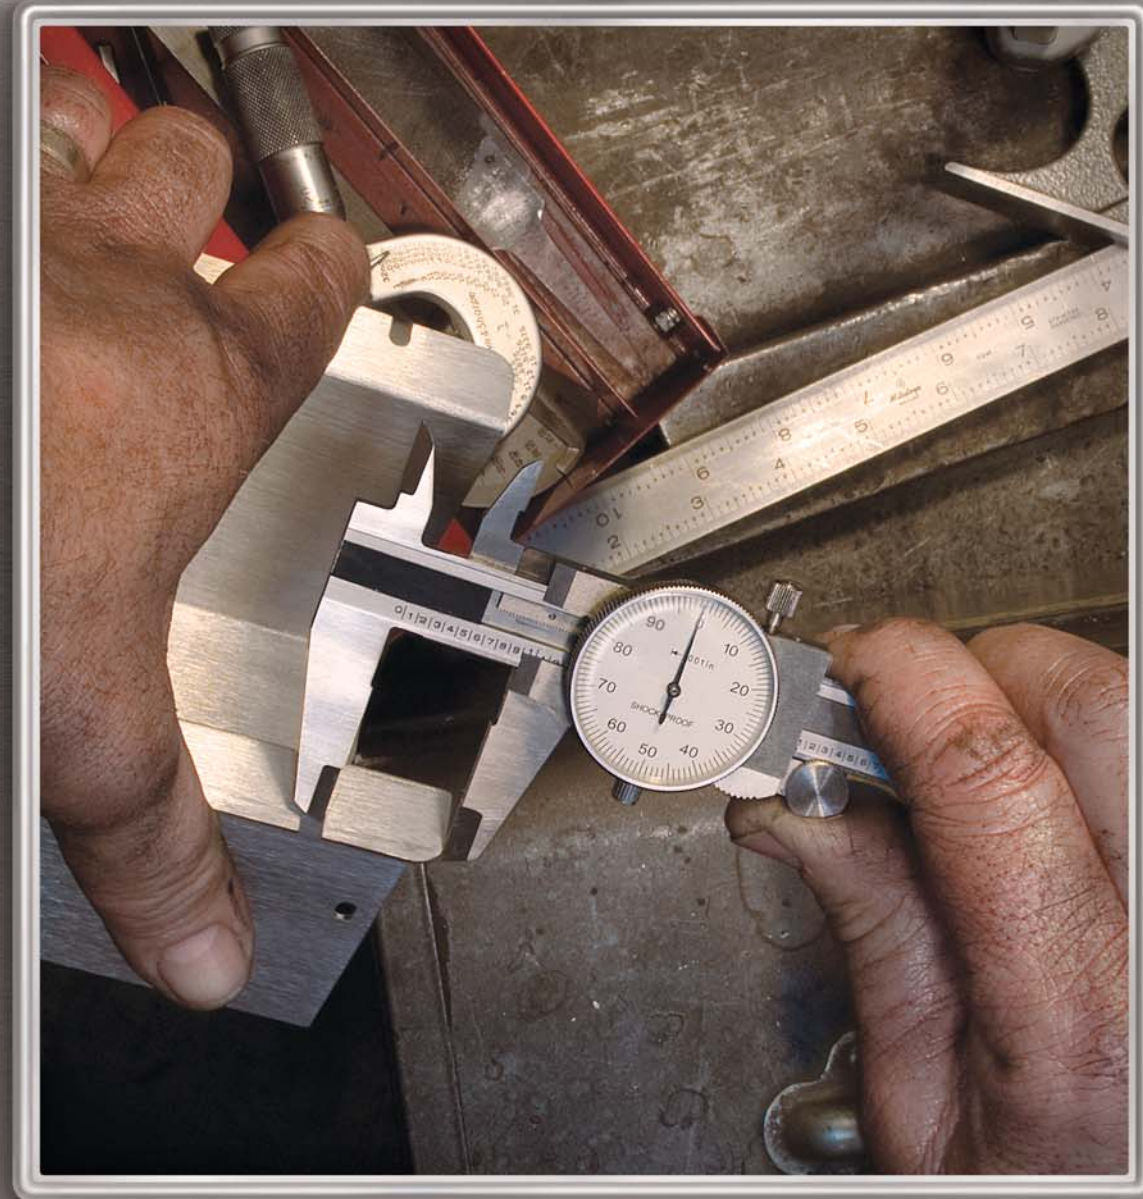

We pride ourselves on our continuous improvements and ability to integrate the most modern processes into our production, such as automated panel bending, laser cutting and robotic welding.

With 115,000 square feet under roof, we promise to meet our customers' needs and advance our production capabilities.

A GENERATION OF METAL FABRICATION

SKILLED. HANDS-ON. PRECISE.

SKILLED. HANDS-ON. PRECISE.

At RC, we understand the demands on businesses today. Like you, we live with this every day... uncompromising delivery schedules, stringent quality demands and steady pressure on the bottom line.

The success and growth of RC is testimony to our ability to meet or exceed the needs of our customers. We combine our dedicated workforce, trained in lean manufacturing with the best fabrication equipment in the world.

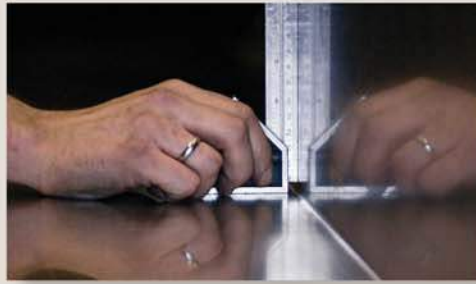

We are ready to quickly deliver a cost competitive solution that exceeds your fabrication needs.

FORMING – Louvers and other unique shapes are precisely formed on our automated Salvagnini punches, panel benders and precision press brakes.

DESIGN, ENGINEERING, AND CONTINUOUS IMPROVEMENT

...Staffed by talented individuals, well-versed in sheet metal fabrication.

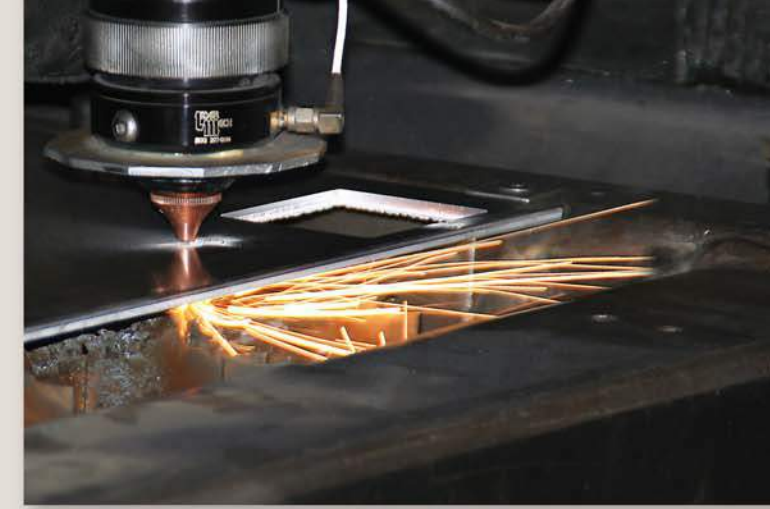

CORNERS

Unique corner forming technology forms perfect corners without notching, welding or grinding.

WELDING – Manual or robotic MIG/TIG welding of a variety of materials completed in accordance with AWS requirements.

LASER

Rapid processing of sheets up to 72" x 144" providing cost competitive edge quality.

POWDER COATING

Automatic and manual coating of custom colors to your specifications. Our skilled operators and superb equipment can meet the most stringent delivery and quality standards of our customers.

CREATIVE DESIGNS, EFFICIENT PRODUCTION, CONTINUOUSLY IMPROVED,

...just like the generator assembly show above.
